

# BRAD NAILER CONCRETE ESSVE GAS F15 1,8MM 50MM

## AREA OF USE

The ESSVE Brad Nailer Concrete F15 1.8/50 is the perfect solution for all your mounting needs in concrete, brick, and sheet metal. With this gas-powered nail gun, you can easily and effectively mount skirting boards, battens, window sills, and much more. Additionally, it is recommended for use in the Nail It Indoor interior wall system, where it provides the most efficient and ergonomic installation of plasterboard on interior walls.

## DESCRIPTION

ESSVE Brad Nailer F15 1.8/50 is both compact and powerful. The tool drives a hardened steel brad directly through wood, metal etc. into concrete and brick. It features easy depth adjustment, providing unparalleled mounting capabilities that saves time and energy compared to drilling, plugging, and screwing. However, it is important to note that you should never shoot directly into concrete or metal without having wood closest to the nozzle! It is recommended to combine with glue for crack-resistant mounting over time.

With a 7.2V Li-ion battery, you can make more shots per charge, and it only takes 2 hours to fully charge. With a capacity of up to 8000 shots per charge and 1100 shots per fuel cell, you can nail your project quickly, efficiently, and worry-free.

- Nail It Indoor interior wall system
- 7.2V Li-ion battery, fully charged in 2 hours, battery indicator
- 8000 shots per charge
- ESSVE Gas 78mm, yellow, 1100 shots
- Steel brads: Ø1.8 mm, L: 15–40 mm
